

6 Aug 07: From a momentum analysis standpoint, there is precious little signs of stabilisation to hang your hat on for the time being. Yet a sharp counter rally could of course ensue with little warning. However, it is worth noting that we saw three 'tell-tale' signs of trouble brewing in recent months, so waiting for at least one or two positive indicators would be the minimum before becoming more positive on the FTSE-100 on a 6-9 month view.
